Cognitive Science Student Journal Authors form

Written contribution

Submit this form together with your LaTeX submission project (use our template) to cogsci-publications@uni-osnabrueck.de.

If you would like to submit a work by several authors, all authors have to fill out this form individually and hand it in as one cumulative submission.

Checklist Written Contribution

Format of your contribution

Written contribution

⬡ Scientific paper, e.g. written for a University course

⬡ Story about a Cognitive Science event at IKW

⬡ Another kind of text, namely _____

Contact details

First name: _____

Last name: _____

Pronouns: _____

⬡ Bachelor student   ⬡ Master student   ⬡ PhD student   ⬡ Alumni

Email address: _____

⬡ Your contribution must not be older than 2 semesters (at time of submission)

⬡ You must have been enrolled as a Cognitive Science Bachelor or Master student at Osnabrück University at the time of writing your submission

⬡ Fill out the consent form

⬡ If you contribute a scientific paper, fill out the attached questionnaire

⬡ Attach a picture of yourself; preferably as SVG or PDF (vector graphic)

⬡ Rename this author form into authorform_yourname

Consent form for a written contribution

◯ I agree that my contribution may be published digitally and in print by the University of Osnabrück. The journal will be published under an open license that allows free redistribution and modification as long as the modifications are under the same license and the authors are credited appropriately. Details about this license can be found at https://creativecommons.org/licenses/by-sa/4.0/

◯ I consent to the editors making editorial changes to my text, including but not limited to correction of references, correction of spelling errors, adjustment of language use, and formatting changes, like used fonts, placement and design of tables and lists, **but I would like to be able to review the proofs of the final document before it is published.**

◯ I agree that my name will be mentioned as the author of the contribution.

◯ I agree that my "personal motivation" will be published together with my contribution.

◯ I agree that the attached picture of myself will be published together with my contribution.

Networking options (optional)

◯ I would like to have my email address published together with my contribution on the journal's website to be reachable for interested readers.

◯ I agree that my name might be published on the social media channels of the Cognitive Science Student Journal to advertise my contribution.

◯ I agree that the attached picture of myself might be published on the social media channels of the Cognitive Science Student Journal to advertise my contribution.

Scientific paper

If your contribution is a scientific paper, e.g. written for a University course, fill this out.

Checklist

- ⬡ I used the Cognitive Science Student Journal Latex submission project and attached my body of work as a Latex project.
- ⬡ I followed the Cognitive Science Student Journal style guide
- ⬡ I followed the guide below: "What makes a good paper for the student journal?"
- ⬡ I am aware that my paper **can not** be published anywhere else before or after submission to the Cognitive Science Student Journal

Paper title: _____

   ⬡ I am the only author of this paper   ⬡ This paper was written by several authors

Which grade did you get for that paper? _____

If you get feedback for the paper, please paste it here (optional):

Your personal motivation

This info will appear next to your name on our website, providing a more personalised introduction.
Which research areas interests you the most within Cognitive Science? (max. 3 terms)

_____

What interests you personally about your chosen topic? (max. 100 words)

What makes a good paper for the student journal?

There are aspects to your paper, which we detailed in the checklist below: One is looking at the formal side of a paper, the other is looking at the content. You do not need to check all the boxes below to submit your paper, as it will go through a review process and some points can be worked on later. These are rather to give you an overview to allow you to self-evaluate your paper. Peer-reviewers will take these points into consideration when looking at your paper.

Formal

- Your paper is clearly structured (e.g. similar to scientific papers in that field)
- You cohesively use of one reference style throughout the paper
    - Ideally, you use the latest version of that reference style
    - You reference in-text references, facts, websites, or online services
    - You reference and label all pictures/ figures
- If applicable, your own opinion/ evaluation is clearly labeled
- You did a spelling and grammar check

Content

- You write reader-centered, meaning that a person who has not conducted your research can understand and follow your line of thought or reasoning
    - You use a clear line of reasoning
    - The purpose of each of your sections is clear
- You clearly state a (falsifiable) research question or hypothesis
- You position your paper in the wider research context through a (short) literature review
- If applicable, you include/ reject counter arguments or opposing research
- If applicable, your description of methods and analysis allow reproduction of your work
- If applicable, your data/ code is accessible to readers
